**CALENDAR DESCRIPTION:**

This course focuses on application of the Model of Transition to individuals and families experiencing health illness transitions. The concept of chronicity related to adult and child health is the central focus of the health illness transitions. The concepts of pain and uncertainty are introduced and primary health care is further explored. A case study format facilitates the integration of theories and use of critical thinking skills.

PREREQUISITES: NURS 120 or NURS 104  
COREQUISITES: NURS 202, NURS 203

**LEARNING OBJECTIVES / GOALS / OUTCOMES / LEARNING OUTCOMES:**

At the conclusion of this course, students will:

1. Apply knowledge of the experience of health, illness, and hospitalization.
2. Apply concepts of chronicity to individual and family health illness transitions.
3. Apply theory related to the concepts of pain and uncertainty to individual(s) experiencing health illness transitions.
4. Explore the application of Primary Health Care principles in the acute care setting.
5. Use the Framework for Caring to develop a holistic plan of care for individual(s) experiencing selected examples of alterations in health.

**METHODS:**

Lecture  
Seminar  
Discussion

**PRIOR LEARNING ASSESSMENT RECOGNITION (PLAR):**

Credit can be awarded for this course through PLAR (Please check:) ☒ Yes ☐ No

**METHODS OF OBTAINING PLAR:**

Examination or portfolio.

none

**STUDENT EVALUATION:**

[An example of student evaluation for this course might be:]

|                          |     |
|--------------------------|-----|
| Case Study Participation | 15% |
| Paper                    | 25% |
| Midterm Exam #1          | 15% |
| Midterm Exam #2          | 15% |
| Final Exam               | 30% |

**COURSE CONTENT:**

[Course content varies by instructor. An example of course content might be:]

Health Illness Transitions

- Experience of hospitalization
- Concepts of chronicity

Concepts Related to Health Illness Transitions

- Pain
- Uncertainty

Concepts Integral to Nursing Program Framework

- PHC Principles applied to acute care setting

Framework for Caring applied to case studies illustrating examples of the following alterations in health:

- Alterations in oxygenation of tissues
- Alterations in body defenses
- Alterations in metabolism/endocrine function and nutrition
- Alterations in fluid and electrolyte balance
