

## OSC 2030 Business Statistics

Spring 2026

### Course Description

---

This fast paced class covers the fundamental statistical concepts of collection, analysis, and interpretation of business and economic data; measures of central tendency and dispersion; probability theory and probability distributions; sampling distributions and statistical inference, including estimation and hypothesis testing. Functional area cases from Finance, Marketing, Accounting and Operations are analyzed. Microsoft Excel is used for computation and descriptive purposes.

### Course Outcomes and Objectives

---

By the end of this course, you will be able to

- Collect, analyze, and interpret business and economic data using appropriate statistical methods.
- Calculate and apply measures of central tendency and dispersion to business datasets.
- Apply probability theory and probability distributions to business scenarios.
- Understand and utilize sampling distributions for statistical inference.
- Conduct hypothesis testing and create statistical estimations for business decision-making.

- Analyze functional area cases from Finance, Marketing, Accounting, and Operations using statistical methods.
- Use Microsoft Excel effectively for statistical computation and descriptive analysis.

## Course Requirements

---

Required for Class:

- Laptop Computer with Excel Data Analysis Pack
- Simple or Scientific Calculator (graphing calculators not allowed on exams)
- No. 2 Pencils (for exams)

Grading Breakdown:

- Participation & Professionalism – 4%
- Project Paper/Presentation – 5%
- Homework Assignments – 23%
- Exam 1 – 34%
- Exam 2 – 34%
- Total: 100%

Attendance: Students must attend all classes, participate actively, take extensive notes, study PowerPoints and Handouts, and complete assigned homework problems.

Homework: No time limit, but only ONE submission allowed per assignment.

Assignments close at the due date/time with absolutely no make-ups or extensions.

Exams: Two proctored exams (closed book/closed notes, paper and scantron format).

No other arrangements except for University-excused absences or ADA accommodations.

Project: Formal presentation and paper applying business statistics concepts to a real company. Only ONE submission allowed on Canvas. No late submissions.

## Required and Recommended Readings

---

Required Readings: Class PowerPoints and Handouts available via Canvas.

Optional Textbook: Business Statistics: A Decision-Making Approach by David F. Groebner, Patrick W. Shannon, Phillip C. Fry, 10th or 11th Edition

## Grading Scale

---

Grade Percent Breakdown

| Grade | Percentage    | Grade | Percentage |
|-------|---------------|-------|------------|
| A     | 94% or higher | C     | 74 - 77%   |
| A-    | 90 - 94%      | C-    | 70 - 74%   |
| B+    | 87 - 90%      | D+    | 67 - 70%   |
| B     | 84 - 87%      | D     | 64 - 67%   |
| B-    | 80 - 84%      | D-    | 60 - 64%   |
| C+    | 77 - 80%      | F     | below 60%  |

Note: Final grades will be assigned as described above. There is no curving of grades or any extra credit.

## University Policies

---

Updated mandatory syllabus policies regarding the ADA Act, Safety at the U, Addressing Sexual Misconduct, and Academic Misconduct can be viewed at:
